*Privileged & Confidential  
A/C Communication*

Mike, Cynthia has prepared a list of possible community involvement activities which we may want to implement to maintain open lines of communication with the community and key stakeholders as well as to foster community engagement while EPA HQ reviews the public comments on the proposed NPL listing. The list below is food for thought for your consideration. Cynthia and I would like to discuss the list with you.

Thank you.

-Mark

Hi, Mark.

To recap our conversation this morning, we agree that it is important to proactively engage with the Columbia Falls community regarding the CFAC site. Our key messages might be that 1) cleanup activities will take place under EPA's oversight, 2) the value of EPA oversight to the community, 3) EPA is continuing to work at the Site while waiting for final listing, and 4) EPA wants to actively engage with the community.

Some of the potential CI actions we should discuss with Mike are:

- Talking to Jenny Chambers about communicating proactively with Governor Bullock's office
- Enlisting Rebecca Russo's assistance in communicating proactively with Montana's Congressionals (maybe not Tester since Mike is doing that regularly)
- Preparing a series of fact sheets
  - Site-specific Superfund process
  - Site-specific explanation of negotiation process
  - Technical issues(?)
- Compiling a master mailing list for fact sheets, press releases, etc.
- Looking for opportunities to submit letters to the editor
- Placing informational advertisements in the local newspapers
- Beginning the CIP preparation process – including in-person interviews in the community
- Hosting public meetings
- Setting up a CAG, identifying community resources (i.e. TASC funding)
- Arranging for presentations at local community group meetings
  - Superfund process
  - Negotiations process/updates
- Setting up an action plan for a smooth transition to new CIC (if needed)
- Exploring contract support for CI activities

Please edit and add anything I have forgotten.

Thanks!
